Profile

A full stack software engineer with about four years of industrial experience developing highly test driven, secured and responsive software solutions. I specialize in object-oriented programming and building complex web applications. I'm an expert in utilizing NodeJS, React, JavaScript ecosystem stack (MERN), Blockchain, Web3, as well as creating and integrating APIs, to create scalable server-side and frontend software applications.

Am passionate about software development and writing clean, efficient and maintainable code; possess good communication skills and pay attention to details, comfortable working in an agile environment. So, my confidence is founded not just on my expertise, but also on the fact that I always learn the most important information, not just the most recent. Have worked with top-notch world class organizations where I added core values to their software, improved performance, and increased production margin and am readily available to do same to yours.

Professional Experience

Frontend Engineer

2024 – 03/2025

Consulting Stream Technologies (CST)

United Kingdom

- Built responsive, component-driven UIs with **React** and **TypeScript**
- Integrated RESTful **APIs** and applied **OOP** principles for scalable architecture
- Optimised performance through lazy loading and state management
- Improved UI consistency, accessibility, and cross-browser support
- Delivered features in Agile sprints with testing and code reviews

Fullstack Developer (contract)

2022 – 09/2023

Vidor

Lagos, Nigeria

- Built full-stack fintech apps using **React**, **Node.js**, and **JavaScript**
- Integrated RESTful **APIs** and handled end-to-end **data flow**
- Optimised performance, **accessibility**, and **responsive design**
- Delivered features in **Agile** sprints with a focus on clean, testable code

Full Stack Developer

2021 – 01/2023

Creative Mansion

Lagos, Nigeria

- Built and maintained scalable web applications using **JavaScript**, **HTML5**, **CSS3**, and modern frameworks
- Led feature development, performance optimisation, and UI/UX refinement
- Delivered responsive, accessible interfaces backed by rigorous testing and clean architecture
- Mentored junior developers, conducted code reviews, and elevated codebase quality
- Executed projects within **Agile** workflows while driving continuous process improvement

Projects

UGB Hostel Management System

05/2025 – present

A Scalable SaaS Platform for Hostel Booking, and Resident Management

A platform for managing hostel bookings, payments, and resident services. supports user authentication, admin dashboards, service requests, and rent tracking — optimised for scale and usability.

Technologies: Next.js + TypeScript + Tailwind CSS

TrealVC Capital

02/2025 – 04/2025

Web3 accelerator with investor onboarding and token-gated access

Platform for a Web3 accelerator, with investor onboarding, project listings, and token-based access. Completed under tight deadlines with reference-based design fidelity.

Technologies: Next.js + TypeScript + Tailwind CSS + Framer Motion

Crypto Nexus

2024 – 09/2024

A real-time crypto analytics dashboard with portfolio tracking.

A responsive web app for monitoring cryptocurrency prices, managing portfolios, and staying updated with curated blockchain news. Features include live market data, chart visualisations, token search, and wallet-based tracking.

Technologies: React + TypeScript + Tailwind CSS + Framer Motion + CoinGecko API

OneFarm Africa

2022 – 2024

Driving Agricultural Growth in Africa

OneFarm is a mutli-faceted digital platform providing innovative solutions to drive Africa's agriculture sector growth.

Technologies: React + TypeScript + Node.js

Skills

Frontend Development — Expert

React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Framer Motion

Backend Development

Node.js, Express.js, RESTful APIs, MongoDB, Mongoose, JWT Authentication, API Design

Full Stack Engineering

MERN Stack, Data Fetching (React Query / SWR), Server-Side Rendering (Next.js), State Management (Redux, Zustand), Code Splitting

Version Control

Git, GitHub, Git Flow, Pull Request Reviews, Branching Strategies

Education

Bachelor of Science – Computer Science

Benin, Nigeria

University of Benin (UNIBEN)

Gained foundational knowledge in software engineering and computational theory.

Zero To Mastery Academy (ZTM)

Learning Rust and Blockchain development with a focus on smart contracts, Web3, and systems programming.

freeCodeCamp

Full Stack Development Certification (*JavaScript Algorithms, Responsive Web Design, APIs & Microservices*)

Project-based curriculum covering frontend, backend, and DSA.
